Inspire Productivity Through Well-being

Grow an on-going sense of belonging and pride through bias for positive action and effectiveness. Measure whether performance and well-being sustainability are a reality.

“ You can build a much more wonderful company on love than you can on fear.

Kip Tindell

OVERVIEW

For decades corporations and organizations have focused their strategies in maximizing shareholder value, based on the assumption that all human beings are driven by first and foremost the principle of self-interest.

This focus has fed the idea of ‘competition’, forming high-performing companies that produce the goods and services society needed and powered economic growth around the world. At the same time, it has left astray the need to look out for employee wellbeing and societal impact outside of business purpose.

In the 21st century business founders, leaders and entrepreneurs understand the correlation between employee satisfaction, collective wellbeing and organizational performance as well as its sustained impact on societies. As these trends continue to develop, companies and organizations want to rethink their capability to measure ‘health’ and grow sustainability in a more holistic model.

We lead your organizations to a holistic social enterprise model through economic, environmental and social sustainability measures.

BENEFITS

Organizations focused on sustainability reporting will gain stakeholder group trust, respect and loyalty including but not limited to these areas:

- Purpose clarified in a strategic narrative driving belonging,
- People focus driving loyalty, trust respect thru data management,
- Competence driving credibility & joy through learning and growth,
- Climate driving safety thru ethics and integrity,
- Equity driving fairness thru social leadership.
